OBJECTIVE: FULL STACK DEVELOPER

HIGHLIGHTS OF QUALIFICATIONS

- Enthusiastic and motivated Mean Stack Developer with 6 months of internship experience in web development.
- Eager to contribute to innovative projects and continue learning in a dynamic work environment.
- Hands-on experience in developing web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js) for both frontend and backend functionalities
- Knowledge of implementing RESTful APIs using Node.js and Express.js to enable communication between the frontend and backend components of the website.
- Proficient in building dynamic and responsive user interfaces by enhancing interactivity using CSS frameworks like Bootstrap.
- Capable of developing schemas and queries in MongoDB to efficiently retrieve and manipulate data according to application requirements.
- Proactively engaging in learning new technologies, tools, and best practices in MEAN stack development, staying updated with industry trends and advancements.
- Have a growth mindset and eagerness to take on new challenges, contributing positively to the team and continuously improving skills and knowledge.
- Proficiency in version control with Git, collaborating with team members through platforms like GitHub to manage codebase and streamline development workflows.
- Ability to multitask, organize and prioritize tasks, problem-solve, and meet deadlines in a fast-paced environment
- Ability to read English with bi-lingual fluency in oral and written English and Punjabi

RELEVANT EXPERIENCE/PROJECTS

Internship Impinge Solutions 2019

Matrimonial (Website Development – Node, Express, MongoDB, JavaScript, GitHub)

- Created a matrimonial website in a group of five using Mean Stack Technology. I developed several responsive and interactive web pages such as home, login, user profile, dashboard, and others. Also, implemented CRUD-related operations using the routes, database connections, defining the model schema, etc.
- Used HTML5, CSS, Bootstrap, JavaScript, and AngularJS as frontend; Implemented backend of the application using JavaScript (Node JS, Express JS) based framework and Visual Studio Code used as build tool.
- Collaborated with the team members to make wireframes using MIRO and worked closely to plan, prioritize, and execute development tasks effectively.
- Ensured code maintainability through an object-oriented approach and documentation.

Training Ansh Infotech 2016

Restaurant (management software – Core Java, MySQL, Xampp, GitHub)

- Developed mini-service ERP by a group of three to help the restaurant administrator manage the

restaurant business and perform proficient work management.

- Worked on various project modules, including customer registration, employee and admin portal, generating bills with a menu, and master data with multiple functionalities to view, edit, and delete all the customers' and employees' details stored in the database, etc.
- GUI builder in NetBeans IDE used for front-end development, XAMPP as a local test server, and MySQL to store and access employee details, administrator access to all data, bill receipt, and other project modules.
